

## CONCERN #14: NATSEC reportedly meets with SPLC “Intelligence Project” director

“Our nation stands at a dangerous crossroad. The mainstreaming of hate and extremism threatens our people, our communities, our education system and democracy itself,” said Susan Corke, Director of the SPLC’s Intelligence Project. ‘

### SPLC director who placed parents’ rights group on ‘hate map’ met with Biden counterterrorism official: report

According to White House visitor logs recently obtained by the Washington Free Beacon, a Southern Poverty Law Center director who just put several major parents’ rights groups on the SPLC’s “hate map,” met with Biden administration counterterrorism officials this year.

The visit happened in the wake of rising calls for the Department of Justice to look into parents’ rights groups and school board meetings to see if there is “domestic terror” activity among those frustrated with what’s being taught in US public schools.

The Free Beacon stated that White House visitor logs have shown that Susan Corke, director of the SPLC’s Intelligence Project met with National Security Council counterterrorism director John Picarelli on January 6 of this year.

Corke, a former US State Department official, also made headlines this week for producing an SPLC report that labeled parents’ rights groups “Moms for Liberty,” and “Parents Defending Education,” among others as extremist hate groups.
